VITO Li

Overview

The primary function of our website is to provide an introduction and display of the daily activities of the diving club. It reflects the value of the activity to the individual, the pursuit of beauty, and the love of life. By showing yourself, we attract like-minded friends to join our club.

When people visit the website , I hope they can feel a love for nature and life.

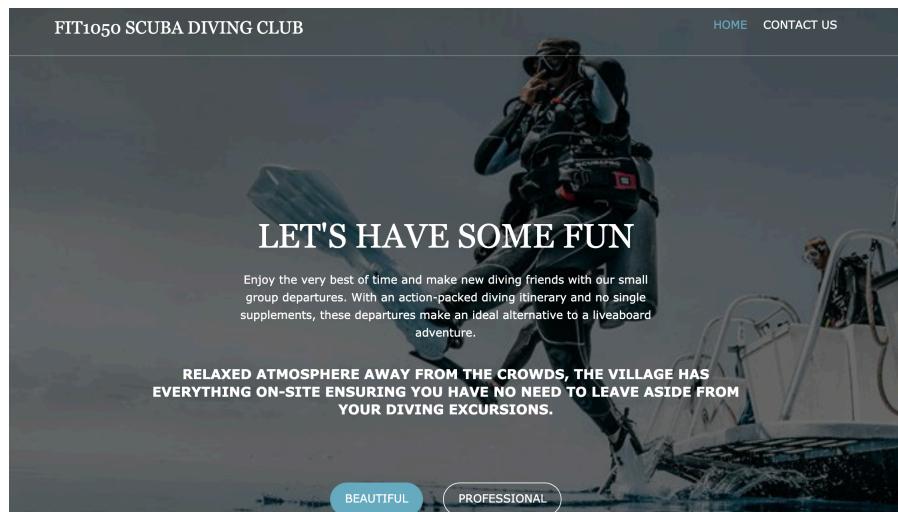

The specific target demographic that the site is designed to appeal to: who are interested in the ocean, curiosity for the unknown world, interested in outdoor sports, especially those who want to participate in Local community scuba diving club , and those are eager to make new friends.

Our living site url: [http://greatabel.github.io/

Brief introduction of some activities and news related to the club, so that the audience can see the influence of the club in the local area

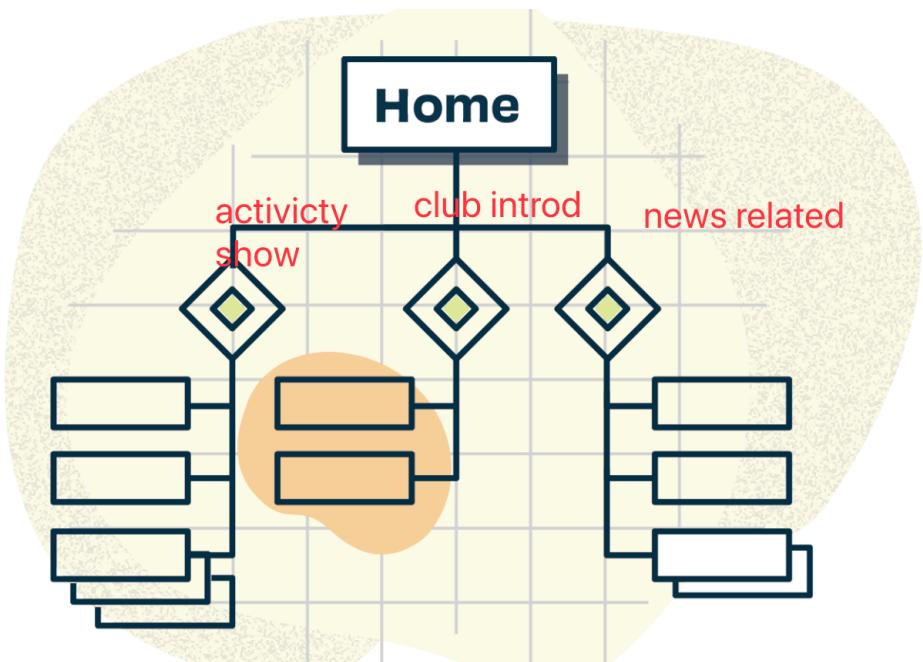

Address and contact function, so that the audience can find us and join us

2. Visual design style

For the visual style, we mainly choose dark blue and black, which fit our theme: ocean, deep diving, mystery. We uphold the Bauhaus philosophy (Form follows Function), style should reflect the essence of our website's main function: diving!

3. Information architecture

4. Accessibility

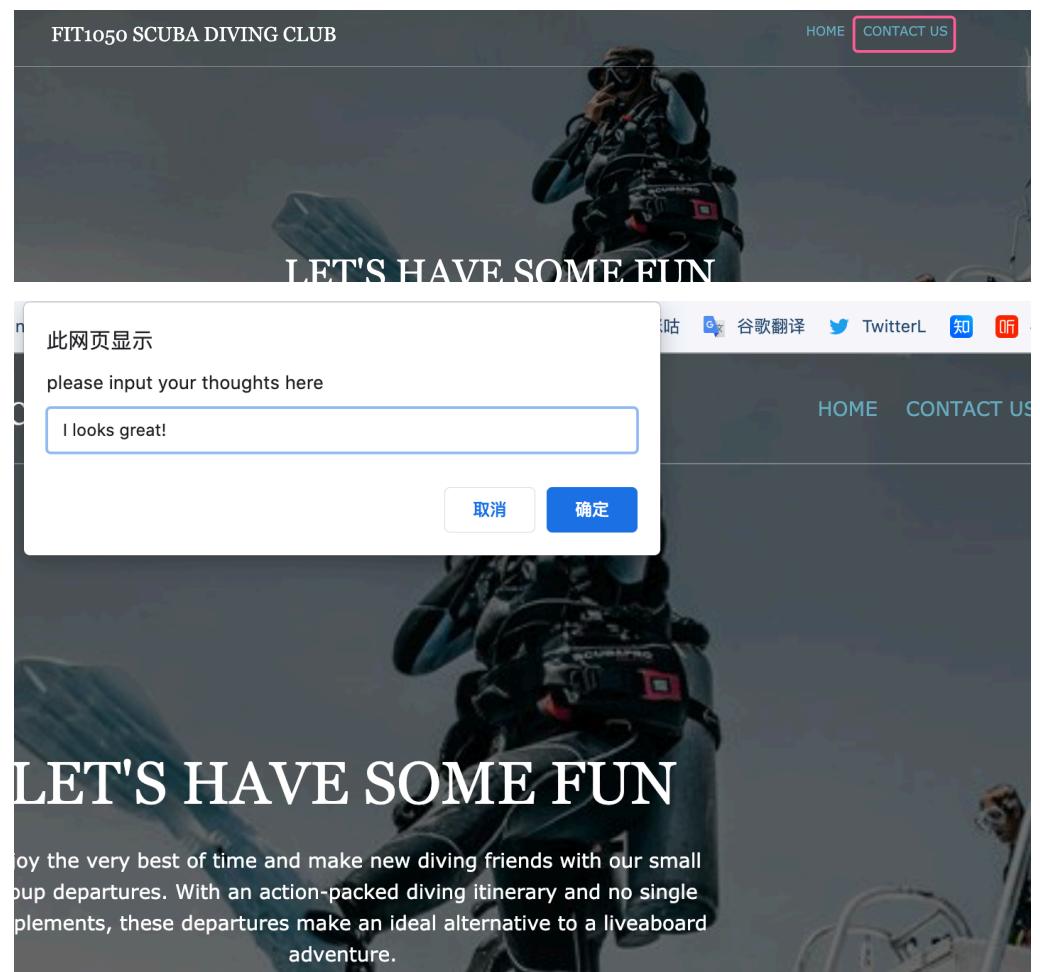

All URLs can be clicked and connected. The URLs that are still under construction are also indicated.

All pictures have corresponding text description and alt introduction

Pictures are cached locally on the website for quick loading. Third-party libraries have also been downloaded locally on the website, no need to request cdn

5. User interaction

We use jquery to write our own interactive functions, users can click to contact us, a dialog box will pop up, leave us a message, and we will guide the user to operate.
